

# *Hilbert HS App*

Now that we have a responsive website, we will be phasing out the use of the Hilbert App. The Hilbert website will now resize itself according to the requirements of your phone, tablet, laptop or desktop computers.

To have an HHS App  like button on your phone, navigate to the Hilbert High School site using a browser on your phone. If you see the site on your phone, stay on the front page of the high school site and then go to the settings (on android its 3 vertical dots on the upper right of the screen) (on an iPhone you **must** use **Safari** to navigate to the HHS site, then use the share button (box with arrow pointing up located at bottom of screen)).

Either way if you press the icon, you will see that one of the menu items says "add shortcut to home screen" or something similar. Press that and you will have the new Hilbert button in your apps. Move it as you would any other app.
